

sensuous transforming of 0 | 1 signal

Media Art as an Awareness Filter, NTT ICC, Japan

PROTOROOM
ModularCulture & Tech

'sensuous transforming of 0 | 1 signal'

is an installation work that allows construction of kits that allow experience and contemplation on the elements of computing while converting and transforming the 0,1 bits into different layers through workshop and exhibition.

ENCODED BY PROTOROOM

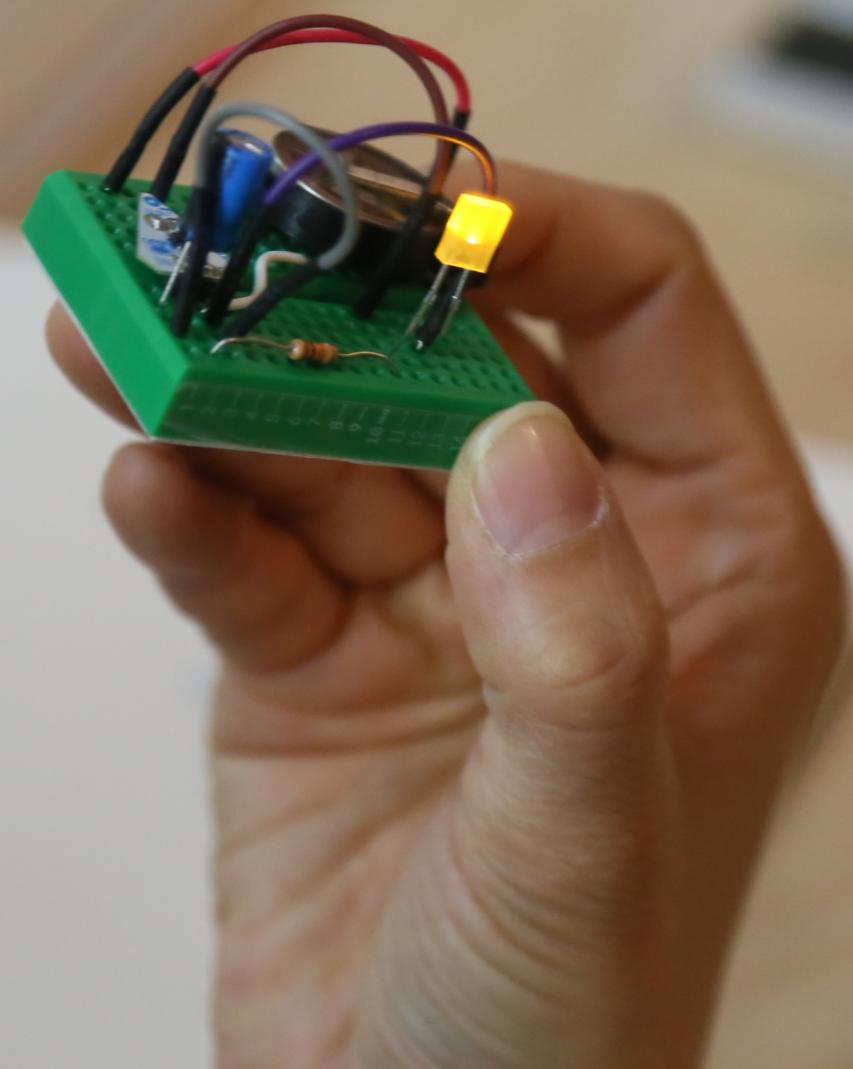

The manual is a formal language for decoding concepts.

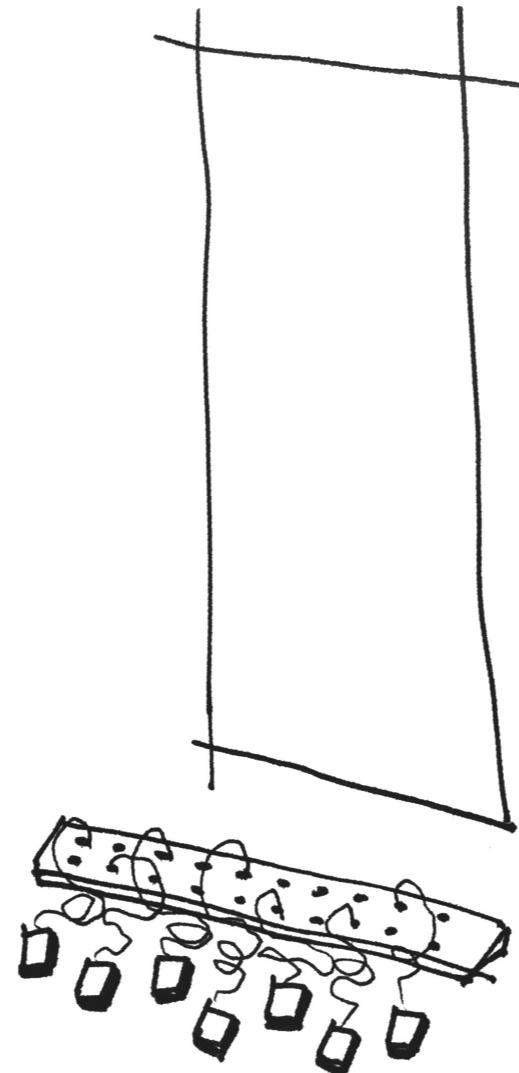

Assembly starting with observation is the process of decoding.

Transforming

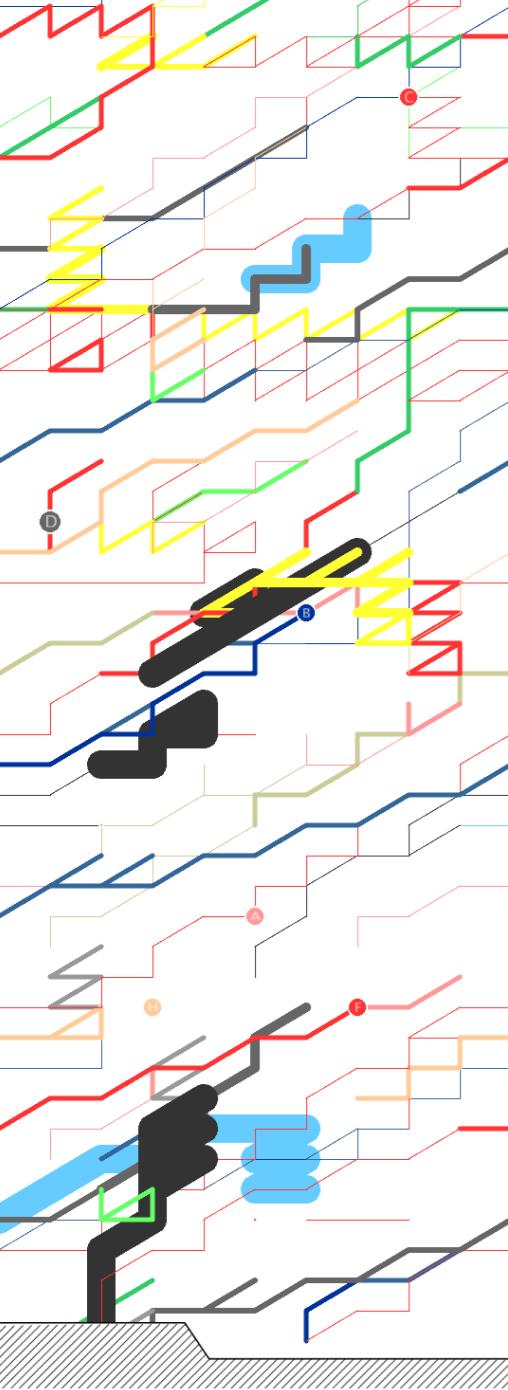

0 | 1 bit, the atomic being of computing,
is sensuously understood by being transformed into light and sound.

Piling up

The bits are gathered to interact as part of the environment.

PROTORM

ModularCulture & Tech

PROTORM is a "metamedia" collective with a creative practice based on the technological medium of KIT. KIT is a meta-medium, leading sensual and cogitative experiences as a mediator of opportunities for discourse and contemplation on technology which has become an undeniable part of ecology. Under the title **<Tech x Kit x Critic>** evolved series of works in the forms of exhibitions and workshops. The collective has been run by **Hoonida Kim** and **Seungbum Kim** since 2014. Recently, they participated with a exhibition X workshop at NTT InterCommunication Center [ICC] ‘Media Art as an Awareness Filer’ (2016, Japan), Nam June Paik Art Center’s exhibition, “Our Bright Future - Cybernetics Fantasy” (2017, Korea) and TRANS BOOKS faire (2018, Japan).
